Company Profile

BAJRANG INDUSTRIES as professional manufacturer of all types of colorcoated profile sheet and Roofing accessories. Our company prime mission is to provide superior quality and strength of products as per international standard strictly. We are manufacturing our all products by our well certified fully automatic machineries with trained and qualified team.

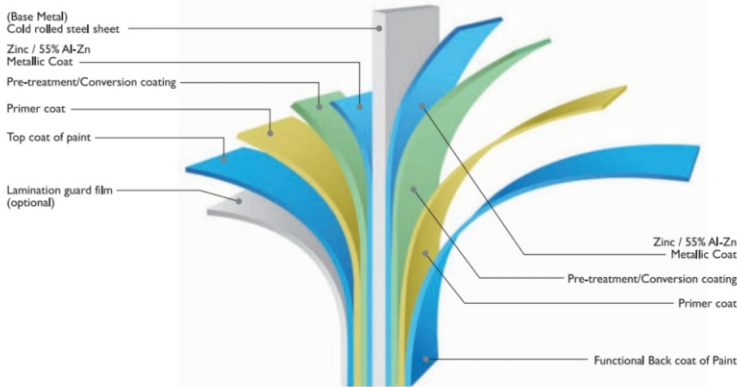

All our efforts are result in to growth at per excellence and also company started getting recognized as on organization compassionately devoted to the policy of "QUALITY" with "VALUE OF MONEY".

Colorcoated Profile Sheet

Our Profile come with Zn-al alloy coating, superior paint quality which is provides sheet longer life and better corrosion resistance. We make sheet from high quality PPGI & PPGL coils from reputed steel makers in india. Our well certified 6-7 high Rib Trapezoidal design make it stronger & increase yield strenght. Our Profile longer span and wider spread ensures ease in installation and save cost.

Air Turbo Ventilator

Wind driven turbo roof air ventilators are designed to exhaust hot air and industrial pollutants such as dust, poisonous gases, fumes, heat, humidity, odor, stale air, dampness and other invisible irritants & Pollutant particles from the building and sheds. Turbo ventilator requires very minimal wind to function, Once in motion it creates a suction and pulls out hot air and other hazardous irritants from the shed and replaces it with fresh air, thus providing a better working environment and increasing productivity.

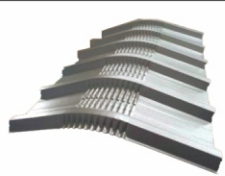

**DOUBLE EXHAUST
AIR TURBO
VENTILATOR**

Advantage -

- ▶ No power exhausting
- ▶ Save energy and money
- ▶ Anti erosion
- ▶ No Noise & Pollution
- ▶ Improves air quality
- ▶ Increases working efficiency
- ▶ Assured ventilation for 24 hour for 365 days
- ▶ Designed to be fitted easily on asbestos
